Education

2022 – 2026 Professional Bachelor's Degree in Electrical Engineering and Industrial Computing, Mechatronics option. Institut des Sciences Appliquées (ISA), USTTB, Bamako.

August 2021 Malian Baccalaureate, Exact Sciences track — Lycée Monseigneur Jean Marie Cissé, Kalaban Coura ACI.

Interests

Sport, music

Reading, travel

Following new technologies

Profile

Web and software developer holding a Professional Bachelor's Degree in Electrical Engineering and Industrial Computing, able to take an application end to end: database, back-end, user interface and deployment.

Self-taught and thorough, I single-handedly designed a SaaS school-management platform that is now live, as well as the supervision software for a vision-guided robotic sorting arm. Looking for a developer position.

Technical Skills

- Back-end: Python (Django), Node.js, EJS
- Front-end: React, JavaScript, HTML, CSS
- Applications: Kivy MD graphical interfaces (Python)
- Databases: PostgreSQL, Supabase, SQLite, Access
- Artificial intelligence: development of AI agents (LLM)
- Tools & deployment: Git, Vercel, Render, continuous deployment
- Industrial computing: PLC programming (Grafcet, Ladder), supervision
- Office software: Word, PowerPoint, Excel, Access — advanced

Professional Experience

Sall Pro Global – Bamako | Solar energy, electricity and security

- Installation of photovoltaic solar systems and CCTV cameras: mounting, wiring, connecting inverters and batteries, configuring recorders and remote access;
- Preventive and corrective maintenance of the installations;

DoniFab (DoniLab) – Bamako | Final-year internship, 3 months

- 4-axis vision-guided robotic sorting arm: three-tier architecture — React interface, Node.js/Express server with SQLite, Python/Flask back-end running YOLOv8 detection;
- Measured results: 93.2% success rate and a 5.1 s average cycle time. Final-year project defended in 2026;

Projects

GES Mali — school management software · live

- Enrolment, grades and report cards, attendance, tuition fees, treasury and payroll; parent portal via QR code. Next.js, Supabase — ges-mali.vercel.app

TBB Fashion — shoe shop management · live

- Point of sale, stock by size and colour, customer loyalty, treasury and PDF reports. Next.js, Supabase — ttb-fashion.vercel.app

Unitech-ERP — school management SaaS

- Built end to end: enrolment, invoicing, grade entry and tracking. Node.js, EJS, PostgreSQL.

Coin-operated automatic water dispenser

- Dispensing control logic, payment handling, user interface;

Additional Training

- Computing — Exper-Lab, before the baccalaureate;
- Electronics and embedded systems, then artificial intelligence applied to IoT — Orange Digital Center, during university holidays;
- University robotics (VEX V5) — MaliBots 2024 Challenge, DoniFab;
- Mobile phone and computer repair — CEDEX, February – April 2026;

I certify that the information above is accurate and verifiable.
